# How to Create a Website Link on Your Home Screen for iPhone

1. Launch **Safari** on your iPhone or iPad.

2. Navigate to the site that you want to create a Home screen shortcut to.

3. Tap the **Share** icon (the square with an arrow pointing out of it) at the bottom of the screen.

4. Scroll down to the list of actions and tap **Add to Home Screen**. (If you don't see the action, scroll to the bottom and tap **Edit Actions**, then tap **Add** next to the **Add to Home Screen** action. After that, you'll be able to select it from the Share Sheet.)

5. Type a name for your site link. This will be the title that appears beneath its icon on your Home screen.

6. Tap **Add** in the top-right corner of the screen.

Your new "web app" will appear in the next available space on your device's Home screen. To move it like you would any other app, tap and hold its icon, then tap **Edit Home Screen**, and you'll be able to drag it to your desired location. When you've placed it where you want it, tap **Done**.
